

## Cooperative Institutes Bulletin: eRA Commons

May 13, 2024

The CIAO has prepared a roundup of reminders and information to assist with navigating eRA.

### Internal NOAA key dates and deadlines for awareness:

- May 31: NOAA sponsors should have provided all NEPA forms, funding memos, and accounting codes for new project proposals
- June 14: The last day awards will be migrated from GOL to eRA
- June 28: NOAA's federal financial assistance cut-off date; all awards must be received by GMD on or before this date
- June 30: GOL "sunsets" for actions [*will have read-only access over the summer*]

### Helpful links:

- This NIH [website](#) offers information and tools to assist recipients with post-award actions.

### No Cost Extension (NCE) Update:

There is an issue with NCE submissions in eRA – specifically, an NCE request for a T1 / parent award will not automatically affect any T3 / project awards. Rather, CIs must submit NCE requests for every award (T1 and T3) they wish to be extended. We are collecting more information at this time and plan to address this with the GEMS PMO team. We will send out an update as soon as we know more.

### Research Performance Progress Reports (RPPRs):

CIs have reported receiving notifications to submit RPPRs for T3 project awards. Please disregard these notices – RPPRs are not required for T3 awards. This issue was elevated with the GEMS PMO team and we've been advised that a fix will be released in eRA on or around May 15.

We are committed to improving our communication and will continue sending regular bulletins. Please direct any inquiries regarding this bulletin to the [CIAO inbox](#).
